

Test Programming Services

**Stellar Quality.
Timely Delivery.**

Ship defect-free products without worrying about complex and time-consuming test program development.

Rely on Acculogic to free you from test program development and fixture design hassles. We'll eliminate your test programming bottlenecks so you can easily meet your production test requirements and ship your products on time. And by using innovative approaches, we will deliver test programs to you with the highest test coverage possible. A dedicated project manager ensures your project is completed on time and within budget, and with our project portal, you always know the status of your project.
